REMARKS

The Action states that restriction to one of the following inventions is required:

Invention I. Claims 1-20 and 33-53 drawn to processing a time division multiple access signals, classified in class 370, subclass 347; or

Invention II. Claims 21-32 drawn to Interference and/or noise reduction, classified in class 375, subclass 346.

In response, Applicants elect Invention I, corresponding to Claims 1-20 and 33-53. Applicants agree that unpatentability of Invention II, which corresponds to Claims 21-32, would not necessarily imply unpatentability of Invention I. Accordingly, Applicants are making this election without traverse, and have canceled Claims 21-32 without prejudice or disclaimer.

In view of the above, Applicants respectfully request allowance of Claims 1 - 20 and 33 - 53. If any extension of time for the accompanying response or submission is required, Applicants request that this be considered a petition therefor. The Commissioner is hereby authorized to charge any additional fee that may be required or credit any refund to our Deposit Account No. 50-0220.

Respectfully submitted,

D. Scott Moore
